IS IT CURABLE?

A Question Often Asked by Those Afflicted With Piles.

Is a strained joint curable? Is local inflammation curable? Of course, if properly treated. So are piles.

People become afflicted with piles and ask some old "chronic" who has always persisted in the wrong treatment and naturally discourages them by telling them that their case is hopeless.

If they turn to discontinue others and thus a disease that might in every case be cured by skillful and careful handling is allowed to run the course of thousands who might free themselves of the trouble in a few days.

Pyramid Pile Cure will cure the most aggravated case of hemorrhoids in an astonishingly short time. It relieves the congested parts, reduces the tumors, weakens, no matter how large, allays the inflammation and stops the itching or itching at once.

Thousands who have resorted to expensive surgical treatment have been cured by the Pyramid Pile Cure—in a number of instances persons who have spent months in a hospital under a pile specialist.

It is a remedy that none need fear to apply even to the most aggravated, swollen and inflamed hemorrhoidal tumors. This remedy is no longer an experiment, but a medical certainty. It is manufactured by the Pyramid Drug Co., Marshall, Mich.

Druggists sell it at 50 cents per box. It is fast becoming the most popular pile cure the country has ever known and druggists everywhere are ordering it for their customers.

IF HE KEEPS HIS HEALTH

He Will Remain Secretary to the End of the Term.

Washington, April 14.—Secretary Alger tonight put an effective quietus on the persistent reports that he contemplated retirement from the cabinet, by a positive and unequivocal statement that he remains absolutely without foundation, and that unless some unforeseen and unexpected contingency arises he proposes to remain secretary of war throughout this administration. Secretary Alger had his attention called to the recent rumors that he would resign after the close of the investigation into the conduct of the war and incident matters, and that his successor had already been determined upon. He said all statements of that character were false, that he had not entertained any such intention, and that they were instigated with the evident purpose of attempting to force him to leave the cabinet. He said he proposed to pay no attention whatever to these attacks.

The Associated Press to make an absolute denial of the reports of his contemplated resignation, and to announce, once for all, in the strongest terms possible, that he would retain his present office throughout his regular term of office. Of course, he added, if there should be a great disaster in his private business affairs or he should be stricken in health or some such wholly unexpected and sudden event occurred, it might actuate him to resign to private life, as a matter of course, but he had not had any idea of resigning, and his determination to remain, despite reports to the contrary, was fixed and unalterable.

General Brooke Finds the Cuban Muster Rolls

SOME THOUSANDS APART

Are the Cuban Rolls and the American Lists.

Havana, April 14.—The Cuban army rolls, which were delivered last evening to Governor General Brooke through Senator Capote, are prepared in a neat clerical style, the broad sheets showing on their face 6,000 names, 6,000 commissioned officers and 6,000 non-commissioned officers and privates. The whole statement is in orderly arrangement of corps, regiments, battalion and company scores. The United States military authorities make no attempt to reconcile the 42,000 non-commissioned officers and privates indicated by these rolls with the 12,219 given in the estimates prepared under the direction of the provisional governors. As a matter of fact, since the American figures were published it has developed that they were in some respects misleading. For instance, in the province of Santiago General Leonard Wood, the governor, reported that there were no Cubans in arms. At headquarters here this was taken to mean that there were no Cuban soldiers in regular camps, the practice being for the Cuban soldiers to separate, going to their homes and to come together forthwith for review, dispersing again afterward. Consequently, for the province of Santiago alone some thousands must be added to the American figures. Moreover, additional thousands must be eliminated from the Cuban list because the men represented are now in official employ. Nevertheless, there is a wide difference between the American estimates and the assembly's list. The Americans will scrutinize the latter carefully and when the payments begin the individuals named must be identified by the various company captains. If the lists vouched for tally, of more than 20,000 non-commissioned officers and privates, the shares, with the deductions, will probably be less than \$100 each. These details have not yet been settled.

He says a member of General Ludlow's staff offered him a quit release if he would depart from Cuba. Hammond, who claims to be a British subject, demands \$5,000 damage for each week he has spent in prison.

TRADE WITH NEW POSSESSIONS

Is Picking Up. Exports Showing the Greater Increase.

Washington, D. C., April 14.—Commerce of the United States with Cuba, Porto Rico, Hawaii and the Philippines already shows signs of revival. The February report of the treasury bureau of statistics shows that in nearly all the articles which we have been accustomed to export to those islands there is a marked increase, while in many articles our new imports from them are showing a corresponding increase. During the month of February, 1899, our purchases from Cuba were considerably greater than in the corresponding month of last year, and during the eight months ending February 28 were \$1,777,777, against \$1,415,000 in the corresponding months of the preceding fiscal year, and \$4,353,391 in the corresponding months of the fiscal year 1897. Our exports to Cuba, meantime, were, in the eight months ending with February, 1899, \$1,242,983, against \$1,698,323 in the corresponding months of last year, and \$4,484,777 in the corresponding months of the fiscal year 1897. From Porto Rico our exports in February were \$126,615, against \$60,536 in the corresponding month of the preceding fiscal year, while our exports in

During the eight months ending with February the imports from Porto Rico were \$255,888, against \$255,824 in the eight months of the preceding year, and the exports to Porto Rico were \$125,063, against \$120,067 in the corresponding months of last year. From the Philippines our imports in February, 1899, were \$277,967, against \$184,333 in the corresponding month of the preceding year, and our exports to the Philippines were \$115,329, against \$130,7 in the corresponding month of last year. During the eight months ending with February our imports from the Philippines were \$2,641,153, against \$2,192,986 in the corresponding months of the preceding year, while the exports to the Philippines in the eight months ending with February, 1899, were \$1,717,021, against \$9,225 in the corresponding month of the preceding year, and our exports to the Hawaiian Islands were \$632,374, against \$564,342 in February, 1899. During the eight months in question our imports from the Hawaiian Islands were \$9,355,910, against \$1,372,888 in the corresponding months of the fiscal year 1898, and \$7,826,656 in the corresponding months of 1897. Our exports to the Hawaiian Islands in the eight months ending with February, 1899, were \$6,606,156, against \$1,952,228 in the corresponding months of 1898 and \$3,067,322 in the corresponding months of 1897. It will thus be seen that our commerce with all of these islands has increased, both as to imports and exports, but that thus far the increase is greater in exports than in imports.

Bottom Falls Out and Seizes the Neighbors Half-Crazy.

San Francisco, April 13.—Passengers on the steamer City of Honolulu, who arrived here on March 23, the time of the great volcano fell out, followed by great clouds of dust and smoke. Some alarm was felt by the guests of the volcano house, occasioned by the noise and the frequent landfalls which followed, but some of the guests became reassured and started to investigate the phenomenon. A hole 120 feet in diameter showed the extent of the cave-in. All attempts to locate the bottom of the crater were unavailing and some authorities place it at 80 feet below the mouth of the crater. Further developments were awaited.
